CA Agile Requirements Designer

CA Agile Requirements Designer

SALES TRAINING: Stage 1

Understand CA Sales Processes

•

= CA Proven Professional Exam

•

= CA Certified Expert Credentials

All Web-Based Training (WBT)
Courses are FREE for Partners

The following learning plan provides the knowledge necessary to achieve the capability outcome of Sales Stage 1:

Course Name	Code	Туре	Duration	Description
"CA Partner Advantage Program" Training Videos	Click Here	Videos	Self-Paced	The CA Advantage Partner Program is the foundation to further grow business and drive our mutual success. Learn how to best leverage this program, along with the CA Partner Enablement Program, to its full advantage. This four-part video series provides the fundamentals of the CA Partner Advantage Program, Reselling with the Program, new Program Rewards for this fiscal year, and also a look at the MSP Partner Program.
"CA Partner Enablement 101" Training Videos	Click Here	Videos	Self-Paced	Bite-sized training modules that explain various aspects of CA's Global Partner Enablement Program. Learn about the Partner Enablement Process, the CA Certification and Accreditation Program, personalized Partner Enablement Dashboards, and more!
Introduction to CA's Partner Relationship Management System	<u>11SFC1005B</u>	WBT	1.75 hours	Modules in this bundle include "New Partner User Registration"; Information in the Partner Account Record"; How a Partner Performs Deal Registration"; "Associate a Child to Parent Opportunity"; "Partner Deal Registration – How to Approve/Reject"; "Create a Partner Opportunity – Internal Perspective"; and "Manage Partner Opportunities".
Modern Software Factory: A Blueprint For Success For CA Partners	76PMR10370	WBT	0.5 hour	This course explains why every company needs to "modernize its internal software factory" to be able to deliver a seamless, high quality digital experience to their customers to meet their customers' demands and ensure business success and brand reputation.
The Modern Software Factory - for CA Partners	Click Here	Website	Self-Paced	To succeed in the application economy, your customers need to deliver digital experiences that enable them to win, keep and serve their customers effectively. They need a modern software factory.
Partner Opportunity Management Review	11SSK15940	WBT	0.5 hour	Partner Opportunity Management Review will take you through the sales stages and process for working deals from open to close.
MANDATORY: TRACE Anti-bribery Compliance Training for Intermediaries	21CMP10130	WBT	1 hour	Identify bribery risks and apply anti-bribery laws in real world situations, gain awareness of the criminal and financial risks of bribery for individuals and companies, and learn how to respond appropriately to requests for improper payments. <i>Mandatory</i> for Partners dealing with Government customers and end users. <i>NOTE:</i> does not function on IE 11.0
ROI Kits: What's Included	76MBU10010	WBT	0.5 hour	CA Technologies ROI Team is equipping direct sales teams and Partners with specific quantifiable impact scenarios for the top selling CA solutions, showing how these solutions generate a broad range of potential operational efficiencies and how those translate into cost savings - reduced OPEX and CAPEX - and better business performance leading to increased revenue generation.

Outcome: the Partner Resource Understands CA Sales Processes

CA Agile Requirements Designer

SALES TRAINING: Stage 2

Understand Market and Solution Positioning

= CA Proven Professional Exam

= CA Certified Expert Credentials

All Web-Based Training (WBT) Courses are FREE for Partners

The following learning plan provides the knowledge necessary to achieve the capability outcome of Sales Stage 2:

Course Name	Code	Туре	Duration	Description
Partner Sales Essentials Kit: CA Agile Requirements Designer	Click Here	Web Page	Self-Paced	One page that lists all of the key materials that Sales and Pre-Sales personnel require to get up to speed quickly on the value proposition of the product. Customer presentations, ROI calculators, white papers, success stories and other 'Sales 101' essentials – all in one place, curated just for you!
Continuous Delivery Ecosystem: Overview 100	88ADO10320	WBT	0.5 hour	Foundational concepts of the Continuous Delivery Ecosystem, and an introduction to the CA products utilized in this process. Course instruction includes a demonstration video of the integrated products working together in a real-world scenario.
Drive Continuous Delivery with Continuous Testing: a Demo of the End-to-End, Integrated CA Continuous Delivery Ecosystem	Click Here	Video	0.5 hour	The modern software factory relies on the ability to deliver software faster, with higher quality—while reducing risk and costs. This is only possible when an organization can delivery software continuously. New tools and an integrated ecosystem are eliminating the testing bottleneck and enabling true end-to-end continuous testing.
Getting Started with CA Agile Requirements Designer	Click Here	Website	Self-Paced	A short interactive learning experience to help you get started with CA Agile Requirements Designer.
Project Management Tools: The Value They Deliver and Where CA Agile Requirements Designer Fits In	Click Here	Video	15 min	A video setting out the value which Project Management tools are delivering to cross-functional teams, and how CA Agile Requirements Designer can work as an accelerator alongside existing tools.
Continuous Delivery 101 Podcast Series – Episode 1	Click Here	Video	45 min	The first episode in a 10 part series with Chris Rowett, VP Worldwide Presales & Faraz Syed, VP Presales & Advisory Services on Continuous Delivery. Learn the fundamentals of Continuous Delivery from the experts!
Enterprise IT leaders share their personal Continuous Delivery experiences	Click Here	Video	5 min	See how SunTrust Bank properly develops and tests 400-500 implementations a year; how Direct Line Group sees a 90% savings on testing costs; and how Rabobank reduces the time and resources to deliver applications from 3 sprints to 1.
Proven Professional, CA ARD Sales 2017	88ARQ2002E	•	0.5 hour	An exam that tests the ability of a Partner Sales Resource to understand and communicate the high-level value proposition of the CA product, as well as its competitive positioning in the market.

Outcome: the Partner Resource Understands the Market and Solution Positioning

CA Agile Requirements Designer

SALES TRAINING: Stage 3

Position and Present the Product to Customers

= CA Proven Professional Exam

= CA Certified Expert Credentials

All Web-Based Training (WBT) Courses are FREE for Partners

The following learning plan provides the knowledge necessary to achieve the capability outcome of Sales Stage 3:

Course Name	Code	Туре	Duration	Description
Customer Presentation: CA Agile Requirements Designer	Click Here	PPT	Self-Paced	This presentation, complete with notes, walks potential customers through the value proposition of CA ARD and how they can realize significant benefits from this solution.
Agile Requirements Designer – Key Concepts	<u>Click Here</u>	Video	20 min	A short demo of the key concepts behind CA ARD, a flowchart modelling tool used by Business Analysts, Programmers, Testers and Automation Specialists alike, to define and test complex systems. Learn the fundamentals of flowchart modelling, and how it can be used to specify processes, data rules, test cases and automated tests.
CA ARD: Overview and Competitive Positioning for Partners	76ARD10010	WBT	0.75 hour	This recording by CA's Continuous Delivery Business Unit provides an Overview and Competitive Positioning of CA Agile Requirements Designer (CA ARD). Recorded July 2017
4 Best Ways to Build and Win ARD Opportunities for Partners	76ARD10020	WBT	1 hour	Learn how: • Traditional testing is keeping organizations at bay in their pursuit of agile testing • Employing model-based testing can free them up to test within the sprint • Focusing on 4 key ARD use cases can be a game-changer for building ARD opportunities and winning them too!
CA Agile Requirements Designer for CA Agile Central	Click Here	Video	0.5 hour	A demo of the two-way integration between CA ARD and CA Agile Central. Watch how existing user stories can be imported from Agile Central and converted to unambiguous, active flowcharts. These complete flows can be exported back to developers as optimized user stories, working to avoid the defects and delays created when business and IT initiatives become unaligned. All the test cases, scripts and data needed to cover 100% of the functionality set out in the user stories can be generated from the flows.
Knowledge Transfer: Position and Present Best Practices - CA Agile Requirements Designer	See Description	КТО	Various	A virtual or in-person Knowledge Transfer session, led by a CA Subject Matter Expert, providing best practices for positioning and presenting the product to Customers. Please contact your CA Enablement Resource to find out about this enablement option.
Certified Expert, CA ARD Sales 2017	See Description	•	1 hour	A one on one evaluation of the capability of a Partner Sales Resource to engage customers in a 20–30 minute discussion to understand how they are addressing current business demands and to explain how CA ARD will address these with reference to one customer use case. Successful completion of this validation results in the award of "CA Certified Sales Expert" credentials. Please contact your CA Partner Account Director (PAD) or Partner Technical Architect (PTA) to schedule this Validation.

All Web-Based Training (WBT) Courses are FREE for Partners

The following learning plan provides the knowledge necessary to achieve the capability outcome of Pre-Sales Stage 2:

Course Name	Code	Туре	Duration	Description
ARD Community Webcast - What's New in ARD 2.2	Click Here	Video	1 hour	Hear from our product experts about the new and exciting functionality which has gone into CA Agile Requirements Designer 2.2. See the revamped HP ALM integration, wire-framing for rapid prototyping, extended data and automation functionality.
CA ARD: Overview and Competitive Positioning for Partners	76ARD10010	WBT	0.75 hour	This recording by CA's Continuous Delivery Business Unit provides an Overview and Competitive Positioning of CA Agile Requirements Designer (CA ARD). Recorded July 2017
Create Optimized Design & Test Assets in CA Agile Requirements Designer, and Allocate to JIRA	<u>Click Here</u>	Video	0.25 hour	A demo of the connectivity between CA ARD and JIRA. Learn how existing JIRA instances can be interrogated from within CA ARD before importing issues via the rich text exporter - accelerating the process of converting existing JIRA assets into unambiguous, "active" flowcharts.
Optimize existing HP ALM test cases in CA Agile Requirements Designer	Click Here	Video	5 min	A demo of how CA ARD can be used to optimize existing HP ALM test cases so you can test 100% of functionality using the smallest possible set of test cases. Learn to drag & drop tests directly from ALM, converting them to an "active" flowchart model. The Test Factory can then be used to compare, de-duplicate & optimize test cases, before exporting the optimal set of tests back out to ALM.
How to Create XML from within CA Agile Requirements Designer	Click Here	Video	15 min	A short demo of how CA ARD can quickly create rich XML for service virtualization and testing. Learn how an existing XML file can be quickly chopped up into parameterized snippets to create a custom configuration file.
How to Create & Maintain Test Automation Scripts in Multiple Languages at Once with CA ARD	Click Here	Video	45 min	A detailed video on how to create multiple automation layers, including building and using RR pairs to populate SV as well as calling the CA TDM batch engine to generate data. Multi-layer configuration in CA ARD means that automated test scripts can be created and maintained in multiple languages at once.
CA Demos On Demand: TDM / ARD / DevTest Demo	Click Here	Demo	Self-Paced	Once you log in, click on "Continuous Delivery" on the DoD home screen and then click on "TDM-ARD-DevTest Demo 3.0" to download demo documentation and use cases, and to reserve time on the Demos on Demand environment.

The following learning plan provides the knowledge necessary to achieve the capability outcome of Pre-Sales Stage 3:

Course Name	Code	Туре	Duration	Description
On-Demand CA Agile Requirements Designer 2.x: Hands-On Lab 200	88ARQ2004S	Dynamic Lab Bundle	2 hours	Foundational concepts needed to begin using CA Agile Requirements Designer. This course introduces the basic user interface and architecture. Learners will gain an understanding of basic visual flows and functionality. Course instruction includes hands-on exercises in a live CA Agile Requirements Designer environment. The materials included supply examples of functional logic needed to generate paths into a canvas-based automation model.
On-Demand CA Agile Requirements Designer 2.X: Optimization and Automation Dynamic Lab Bundle	88ARQ3002S	Bundle	6.5 hours	Advanced concepts needed to effectively use CA ARD. Students will gain an understanding of optimization and automation features, such as data generation, using Data Painter, creating sub-flows, analyzing change impacts, creating filters and constraints. Course instruction is web-based and self-paced, and includes hands-on exercises in a simulated CA ARD environment designed to give students the experience of using the product in realistic scenarios. This course is designed for those IT professionals who have a basic knowledge of CA ARD and wish to utilize some of the advanced features available in this tool. This class consists of 6.5 hours of SELF-DIRECTED learning including lab activities.
CA Agile Requirements Designer: PoC Best Practices 200 (Pilot)	88ARQ20010	Digital Book	2 hours	You will learn how to ask specific discovery questions that will help you learn more about a customer's business problem and pitch CA ARD appropriately. You will also get an overview of the challenge faced by certain key personas for CA ARD such as business analysts, QA manager, test engineers, and test automation engineers. In the book, you also learn about the best practices associated with conducting PoC's and how you can apply them in a CA ARD PoC opportunity. Finally, and most importantly, you will learn how to close a PoC so that all stakeholders at a customer site see the value of using CA ARD in their development environment.
Knowledge Transfer: POC Best Practices - CA Agile Requirements Designer	See Description	КТО	Various	A virtual or in-person Knowledge Transfer session, led by a CA Subject Matter Expert, providing best practices for completing a Proof-of-Concept exercise with Customers. Please contact your CA Enablement Resource to find out about this enablement option.
Certified Expert, CA ARD Pre-Sales 2017	See Description	•	n/a	An in-person evaluation of the capability of a Partner Resource to perform a basic Proof Of Concept of CA Agile Requirements Designer. Please contact your CA Partner Account Director (PAD) or Partner Technical Architect (PTA) to schedule the validation exercise that results in this certification. Successful completion of this validation results in the award of "CA Certified Technical Sales Expert" credentials on this product.

Shadowing	n/a	n/a	Self-Paced	The Partner will provide opportunities for each individual who has achieved Proven Implementation Professional credentials to shadow under more experienced personnel. This will allow mentoring in a customer environment. If the Partner does not have more experienced personnel, they may hire CA Services Architect(s) and CA Services Consultant(s) on initial projects to mentor newly trained staff. This can be scheduled by your CA Partner Account Director (PAD) or your CA Partner Technical Architect (PTA). Note: CA's experience is that the Proven Implementation Professional individual will be ready to perform independently after 2-3 customer projects.
CA Agile Requirements Designer 2.x Case Study Lab Exam	<u>88ARQ3004E</u>	Lab	Self-Paced	This case study lab & evaluation leads to credentialing for Certified Expert, CA Agile Requirements Designer Implementation. The prerequisite to this lab activity is the credential of Proven Professional, Agile Requirements Designer Implementation. This case study lab & evaluation requires that you demonstrate the ability to install and configure CA Agile Requirements Designer using enterprise deployment best practices. The Case Study Guide provides instructions and outlines the specific requirements to configure and manage CA Agile Requirements Designer in a virtual lab environment. You will be assigned 40 active virtual machine lab hours to complete the hands-on lab/case study over a three-week period. After successfully completing the case study lab, you must document your completed solution and submit it along with your enterprise deployment architecture diagram to start the certification evaluation process.
Certified Expert, CA ARD Implementation 2017	See Description	•	Self-Paced	Pre-Requisite: Current 'CA Proven Implementation Professional' credentials for this product and completion of the Case Study Lab Exam. The criteria for this certification is the capability of performing advanced installation and configuration activities with the CA solution for a Customer. Once the individual has completed two successful Customer engagements with the CA product; OR completed 40 hours of Lab Validation and then successfully passed the Lab Validation exam, the consultant will be awarded "CA Certified Implementation Expert" credentials on this product.
